

Edoardo Vincenzi

Senior Frontend Engineer — React / Next.js / TypeScript

Valeggio sul Mincio, Verona, Italy | edoardo.vincenzi95@gmail.com | +39 340 2136572 | linkedin.com/in/edoardo-vincenzi | edoardovincenzi.com

SUMMARY

Senior Frontend Engineer with 9 years of experience building high-performance web applications with React, Next.js, and TypeScript. Comfortable owning architecture decisions end-to-end — from event-driven, real-time systems (Server-Sent Events) to AI-powered data pipelines (Vercel AI SDK, tool calling, evals) shipped to production.

SKILLS

- Frontend: React, Next.js, TypeScript, Vue.js, JavaScript (ES6+)
- State Management: Redux, Redux-Saga, Zustand, TanStack Query / React Query
- UI & Styling: Tailwind CSS, ShadCN UI, Material UI, Ant Design, Styled Components, Figma
- Testing: Playwright, Vitest, React Testing Library, Cypress, MSW
- Real-time & Architecture: Server-Sent Events (SSE), Micro Frontend / Module Federation, i18n, WCAG accessibility
- AI / Agentic Engineering: Vercel AI SDK, tool calling & streaming, structured-output evals, LLM-based OCR pipelines
- Other: NestJS, PostgreSQL, Git, C# / .NET (legacy)

EXPERIENCE

Senior Frontend Engineer & UX/UI Designer — Freelance | Sep 2024 – Present

Selected projects:

Battlepip — Real-time trading game (PWA)

Designed and built an event-driven trading application using Server-Sent Events, with an interactive trading dashboard built on TradingView Lightweight Charts. Solved cross-origin connectivity constraints between a Vercel-hosted frontend and an AWS EC2 backend in production. Built and delivered as part of a two-person engineering team.

Geeks Creation — AI-powered document processing

Built an application that uses AI vision models to extract structured data from images and automatically populate a CRM. Orchestrated multi-step pipelines with the Vercel AI SDK (tool calling, streaming) and built an evaluation layer to track and improve extraction accuracy over time.

Toduba — Codebase refactor & testing strategy

Refactored a Next.js/React codebase for scalability and maintainability. Introduced a testing strategy spanning unit (React Testing Library, Vitest) and end-to-end (Playwright) coverage.

Red Software — Large-scale management platform

Built a large-scale management application from scratch (Next.js, TypeScript) covering complex workflows, roles, and permissions. Used Redux/Redux-Saga, Ant Design, NextAuth, i18n, and Leaflet/Google Maps for map visualizations; collaborated on backend APIs (NestJS).

MeApp — Internal tools & mobile app

Led development of two internal back-office applications and a mobile app for a recycling startup, using React, React Native, Turborepo, TypeScript, ShadCN UI, and Tailwind CSS. Owned the project lifecycle end to end.

Mom — Financial guidance & investment platform

Reworked the application's workflow in Figma and designed the new product from the ground up, translating client needs and business flows into a redesigned user experience. Built an accessible (WCAG-compliant) investment portal for simulating and forecasting investment growth, including full user management, subscriptions, and financial decision-making flows (Next.js, ShadCN UI, TypeScript).

Crm Dematech Impianti — CRM for construction/electrical sites

Led development of a CRM managing construction sites, project tracking, client relationships, and billing, using React, TypeScript, React Query, and ShadCN UI.

Senior Frontend Engineer & UX/UI Designer — Primaton | Aug 2024 – Jun 2025

Built new applications from scratch (React, TypeScript, Zustand, Material UI, Redux, i18n, Tailwind CSS). Designed the full user experience in Figma. Implemented a Micro Frontend architecture with Module Federation. Built and maintained a testing suite (Cypress E2E, React Testing Library unit tests).

Frontend Engineer & UI Designer — Freelance, Alma lura | Jun 2024 – Jul 2024

Built legal management software from scratch (Vue.js, TypeScript). Designed the full user flow and UI (Figma, Penpot). Contributed E2E (Cypress) and unit (Vitest) test coverage.

Frontend Developer — Archiva Group | Oct 2021 – Oct 2023

Built new applications (React, TypeScript, Redux, Zustand, Material UI, Storybook, Styled Components, Tailwind CSS). Established frontend guidelines for internal and external collaborators and designed a corporate Material UI theme to speed up new application development.

Earlier Experience

- Software Developer, Enerj (Jan 2021 – Oct 2021) — CRM development (HTML, CSS, JavaScript, jQuery, C# .NET Framework 4.8); database management with PostgreSQL.
- ICT Developer, Archiva Group (Jun 2017 – Mar 2019) — Built WPF applications in C#; mapped source-system data (XML, flat files, CSV, EDIFACT) to data warehouse tables using Informatica Data Transformation Studio and Altova MapForce.

COURSES & CONTINUOUS LEARNING

- AI Coding for Real Engineers — Matt Pocock / AI Hero: Claude Code, agentic patterns, AI-assisted development
- Build DeepSearch in TypeScript — Matt Pocock / AI Hero: production-grade DeepSearch agent, AI SDK, multi-step reasoning
- AI SDK Crash Course — Matt Pocock / AI Hero: streaming, tool use, multi-step agents
- Total TypeScript — Matt Pocock: advanced type system, generics, application architecture
- Spaghetti Prompt — spaghettiprompt.it: Italian-language prompt engineering course

EDUCATION

- React Academy (74h) — IT Talent Factory / Job SelectJob, Oct–Dec 2022
- Master's in Front-end Development (480h) — Start2impact University, May 2021 – Aug 2022
- Bachelor's Degree in Computer Science — University of Verona, Oct 2014 – Dec 2020 (GPA 3.7/4.0)
